ELBUR

Elbur – always close to people

For years, we have passionately designed and manufactured innovative solutions that meet the needs of individuals requiring long-term care. Our range includes rehabilitation beds, bedside cabinets, tables, and patient lifts – all to make everyday life simpler and care easier. We understand that our products are made for extremely complex customer needs, that is why we constantly ask ourselves: How can we better meet their needs? How to make their everyday life easier? How to make patients more independent thanks to our products and how to reduce the workload of the carers as much as possible?

By focusing on their needs, we create products that have one thing in common: they all help to create a friendly, safe and dignified environment that improves the quality of life.

20 years of experience in the international market

For almost 20 years we have combined experience with passion and innovation. We have created an extensive catalog of varied solutions that have earned an excellent reputation among our customers, from nursing homes and healthcare facilities to individuals who wish to remain in their home environment.

Our products are recognized in Europe and worldwide. They can be found in most European Union countries as well as Australia and the Far East.

Reliability and safety of products

Our philosophy of complex production, which consists of preparing the construction of our products from scratch and not only the final assembly of components, allows for an uncompromising approach to quality. We combine proven and supervised technologies in our company with components from reputable suppliers, recognized in Europe and the world. The medical quality management system EN ISO 13485, which we maintain and continuously improve in the areas of design, production, and distribution of medical devices is a cornerstone of our safety philosophy.

Tailored solutions

We understand that the requirements of our equipment users depends on their reduced mobility and health status. That is why we offer a variety of solutions – including several long-term care bed models with different designs and functional capabilities. We manage even the most demanding tasks, always according to customer expectations and always on time. We invite you to familiarize yourself with our latest solutions, and also to contact us. Our consultants will be happy to help you match the equipment that will meet your functional expectations and improve the quality of life of your customers.

DETAILS:

1. Safe working load: 200kg
2. Handset with lockable functions
3. Brake castors
4. Linak drive system
5. Knee section adjustment (option)
6. Wooden cover for the front panel (option)

OPTIONS:

mattress support material • mattress support platform length • Trendelenburg position

BASIC TECHNICAL DATA:

Safe working load:	200,0 kg
Maximum user weight:	165,0 kg
Mattress support platform height adjustment	from 40 to 80 cm
Back rest adjustment:	0 ÷ 70°
Lower leg rest adjustment:	0 ÷ 20°
External dimensions (length × width):	214 × 101 cm
Clearance under the bed:	approx. 25 cm
Total weight:	85,6 kg
Castors:	100 mm with a brake

FUNCTIONS:

PB 325 LOW

Our PB 325 Low bed for long-term care has been designed with the utmost comfort and safety of patients, as well as the convenience of caregivers, in mind. A key feature of this innovative solution is the low bed height, which significantly reduces the risk of falls, thereby increasing user safety. An additional benefit of this model is the option to equip it with wooden end covers.

PB 331

The PB 331 bed is the most popular bed model in the Elbur range. Homely character, practical functions, and proven solutions make it a popular choice for use in long-term care facilities and in the home environment. Due to the possibility of colour matching, it blends harmoniously into any environment.

In the picture: PB 331 bed, standard design in beech. Accessories: cabinet Rubens 9 in beech and the coat rack.

ADJUSTABLE LEG SECTIONS

ADJUSTABLE BACK SECTIONS

ADJUSTABLE HEIGHT OF MATTRESS SUPPORT PLATFORM

PB 636

A special feature of the PB 636 bed is the possibility of lowering the mattress platform down to a level of 29 cm. The low position allows for increased comfort and significantly reduces the possibility of injury in the situation of accidental falls. The height adjustment range allows caregivers to work in optimal conditions. The possibility of using the divided side rails means that the user does not have to be restricted by the side rails in the bed.

In the picture: PB 636 bed sonoma oak, with divided rails on one side of the bed. Accessories: bedside lamp.

BEDSIDE CABINETS

RUBENS 1

Practical design and a wide range of colours make the Rubens 1 bedside cabinet a perfect solution for storing personal belongings. It provides an excellent complement to the Elbur care beds. Convenient table top folding system, drawers and doors opened on both sides make that the use of the cabinet is very simple and adaptable.

Safe working load:	6 kg
Dimensions (height × depth × width) [cm]:	87×45×53 (119)
Weight:	34 kg

Rubens 1

RUBENS 1 OT

Rubens 1 OT is a perfect complement to the Elbur care beds. This bedside cabinet has a drawer, an open shelf and a closed space with a shelf that allows patients to store their personal belonging within easy reach from the bed.

Dimensions (height × depth × width) [cm]:	87×45×43
Weight:	25 kg

Rubens 1 OT

RUBENS 2

Rubens 2 bedside cabinet is distinguished by its great versatility thanks to additional height and angle adjustment system of the wooden table top. Invaluable functionality along with the possibility of a matching colours fit with the Elbur care beds, make this bedside cabinet model a very frequent choice as an equipment in the long-term care facilities and in home care as well.

Safe working load:	6 kg
Dimensions (height × depth × width) [cm]:	87×45×53 (121)
Weight:	41 kg
Height adjustment range [cm]:	71÷99
Angle adjustment range [°]:	0÷35

Rubens 2: the cabinet with height and angle adjustment system of the wooden side top

OVERBED TABLES

RUBENS 3

Rubens 3 overbed table works perfectly as a compliment to our beds. A wide range of height adjustment and multi-angle adjustable system of the wooden top simplify eating meals, reading or using mobile devices.

Safe working load:	11 kg
Dimensions (height × depth × width) [cm]:	72×90×45
Weight:	15 kg
Height adjustment range [cm]:	72÷107
Angle adjustment range [°]:	0÷52

Rubens 3

Rubens 9

RUBENS 9

An economical model of an overbed table is a proven solution in the long-term care. Angle adjustment of a wooden top and a wide range of height adjustment, improve user comfort and quality patient care. Rubens 9 stands out as a very stable and high quality product. It has 6-position height adjustment in the range of approx. 79-114 cm.

Safe working load:	20 kg
Dimensions (height × depth × width) [cm]::	79×78×42
Weight:	10 kg
Height adjustment range [cm]:	79÷114
Angle adjustment range [°]:	0÷45
